SSMS: Install and Setup Instructions for the NMEDW Test Database
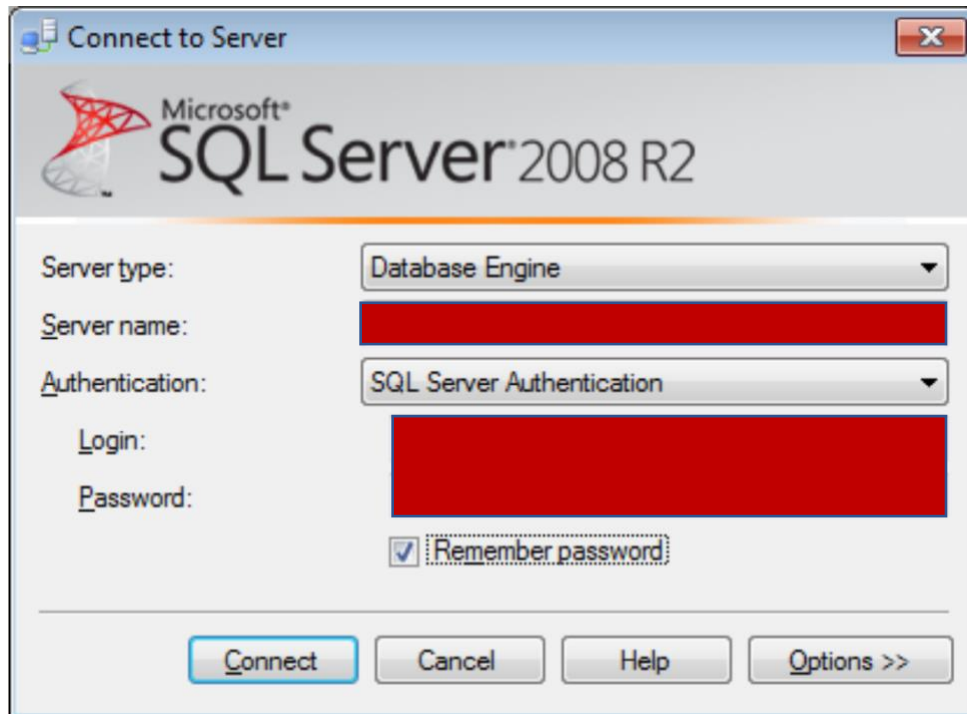

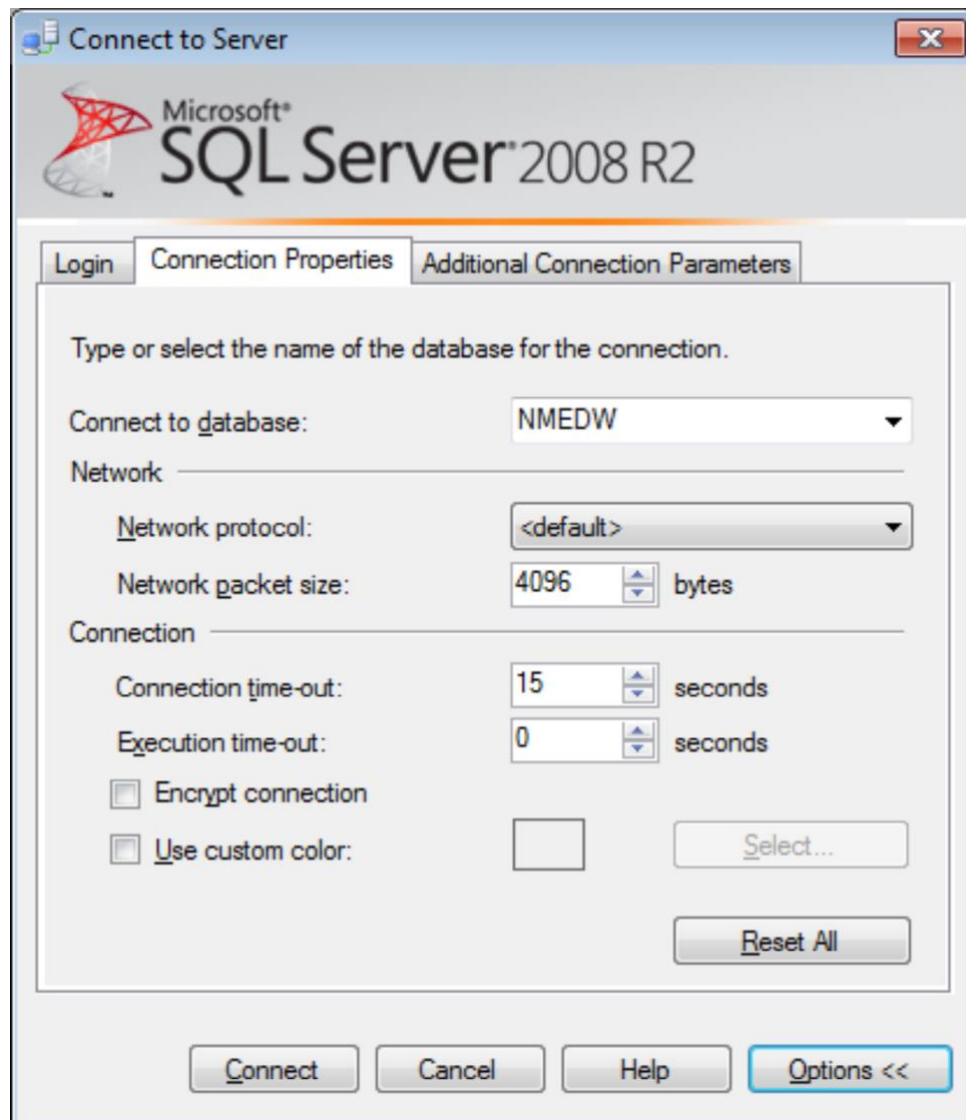

1. Install SQL Server Management Studio (SSMS)
   a. ***Available for Windows ONLY***
   b. If you already have SSMS installed, make sure it is version **2008 R2 or above.**

2. Obtain connection information from the instructor and enter the following in the 'Connect to Server' window:
   a. **Server name:** …
   b. **Login:** …
   c. **Password:** …

   d. If this window doesn't open automatically, go to **Object Explorer > Connect > Database Engine.**

3. Click the **Options >>** button. On the "Connection Properties" tab, enter the following in the 'Connect to database' field: **NMEDW**

Go to the SSMS Documentation for tutorials and tips.
